MVP Prompt

Project Overview

```
None
Build a non-functional MVP demo web application for "Arete" - an AI-powered debate practice platform for debate academies and schools. This is a screenshot-based demo for customer validation, not a functional product. All data should be hard-coded/mocked.

Platform: Web application optimized for Cursor IDE development
Purpose: Customer discovery validation, demonstrating UI/UX to potential partners
Target Users: Debate students and instructors/coaches
```

Brand Identity

Brand Name & Tagline

- **Brand Name:** Arete
- **Primary Tagline:** "Find Your Voice. Sharpen Your Argument."
- **Secondary Tagline (B2B):** "AI-Powered Debate Practice for Academies and Schools."

Logo Concept: "The Voice Bubble"

- Combine three elements:
    1. Speech bubble (dialogue, argumentation, spoken word)
    2. Debate podium/pillar (structure, competition, elevation)
    3. Subtle AI circuitry representation

Color Palette

```
None
Primary Blue: #2563EB (Buttons, headings - intelligence, confidence)
Secondary Blue: #3B82F6 (Secondary UI - stability, reliability)
Accent Orange: #F97316 (CTAs, notifications - energy, action)
Accent Purple: #8B5CF6 (Premium features - creativity)
Success Green: #22C55E (Positive feedback - growth)
Error Red: #EF4444 (Areas for improvement - urgency)
Background: #F8FAFC (Light background)
Card Background: #FFFFFF
Text Primary: #1E293B
```

```
Text Secondary: #64748B
```

Typography

```
None
Primary Font: Inter (Sans-serif) - for headings and body text
  - Clean, modern, highly readable
  - Google Font: https://fonts.google.com/specimen/Inter

Secondary/Accent: Outfit (Sans-serif)
  - Friendly, rounded, complementary
  - Google Font: https://fonts.google.com/specimen/Outfit

Monospace: JetBrains Mono (for any technical elements)
  - Google Font: https://fonts.google.com/specimen/JetBrains+Mono
```

Brand Voice Guidelines

- **Encouraging:** Supportive coach tone - firm but kind, constructive not critical
- **Clear:** Avoid jargon; explain complex concepts simply
- **Professional:** Maintain credibility, especially in B2B communications
- **Playful:** Embrace youth debate culture energy and enthusiasm
- **Empathetic:** Understand student struggles - we've been there

Pages & Components to Build

Layout Foundation

```
None
Global Layout:
- Fixed top navigation bar
- Left sidebar (for logged-in views)
- Main content area
- Footer (minimal)

Navigation:
- Logo (left) with "Arete" brand name
- Navigation links (right): Dashboard | Practice | Tests | Drills | Profile |
Logout
- Organization switcher (for instructors)
```

VIEW 1: STUDENT ACCOUNT

Page 1: Student Dashboard

Layout: Left sidebar navigation + main content

Left Sidebar Components:

```
None
- Arete Logo (top)
- Navigation Items:
  - Dashboard (active state with icon)
  - Practice (icon)
  - Matter Tests (icon)
  - Drills (icon)
  - Progress (icon)
- User Profile (bottom):
  - Avatar (placeholder)
  - Student Name
  - Role: "Student"
  - Organization: "Capstone Debate Academy"
```

Main Content - Dashboard:

```
None
Header:
  "Welcome back, [Student Name]!"
  Subtitle: "Your next practice session awaits"

Current Practice Session Card (Priority):
  Motion: "THW ban advertising targeted at children."
  Format Badge: "WSDC" (with small flag/pill)
  Role Badge: "Prime Minister" (P1)
  Chosen motion/Randomised --> select

  Quick Stats Row:
    - ⏱️ Prep Time: 15:00 (timer countdown)
    - 🎯 Format: WSDC
    - 📝 Role: P1 Speech

  Primary CTA Button: "Start Practice" (Accent Orange #F97316)
```

```
Quick Action Grid (4 cards):
  [Practice Speech] [Matter Test] [Drill] [Review Feedback]
  Each with icon, title, and brief description

Recent Activity:
  - Last practice: 2 days ago
  - Feedback received: 3 new comments
  - Matter test score: 4/5 (latest)
  - Correction submitted: 1 pending review

XP/Streak:
  - Current Streak: 5 days
  - Total Practices: 23
```

Page 2: Practice Session

Layout: Full-width with timer prominently displayed

Practice Interface:

```
None
Header:
  Back button | "Practice Session" | Timer: 15:00

Motion Display:
  "THW ban advertising targeted at children"
  Format: WSDC | Role: Prime Minister (P1)

Timer Component:
  Large countdown display (minutes:seconds)
  Controls: [Start] [Pause] [Reset]
  Progress bar showing time used

Recording Interface:
  Mock microphone icon (pulsing animation style)
  Record button (large, red circle)
  Note: "Record your 8-minute speech"

  Mock recording visualization (audio wave animation)
```

```
  Options:
    - [Allow Camera] toggle (for future video)
    - [Microphone Selector] dropdown

Status Information:
  - Prep time remaining: 12:30
  - Speech time: 0:00 / 8:00
  - Recording status: "Ready to record"

Preparation Tools (Sidebar or Accordion):
  - Motion analysis
  - Key arguments
  - Rebuttal notes

  (All placeholder content with "Prep notes will appear here" text)
```

Page 3: AI Feedback Report

Layout: Two-column with detailed feedback breakdown

Feedback Overview:

None
Header:
  "Feedback Report"
  Subtitle: "THW ban advertising targeted at children"
  Format: WSDC | Role: Prime Minister

Student: [Student Name] Motion: "THW Ban Advertising Targeted at Children" Format:
WSDC | Role: Prime Minister (P1) | Speech Length: 7:42 / 8:00

MATTER (Content & Analysis)

Analytical Strengths

1. Strong Instinct for the Core Issue
   You correctly identified that children are impressionable and that companies
      have profit-driven incentives
   You've touched on something really important here—the tension between child
      psychology and commercial interests. This is exactly the kind of tension
      that makes a great debate motion.
```

2. Recognized the Business Motivation
   Good identification of corporate profit motives
   Spotting the 'why' behind advertising is a great analytical move. This shows you're thinking critically about incentives, not just surface-level arguments.

Areas to Improve

1. No Impactful Opening Hook
   You started with: 'The motion is THW ban advertising targeted at children.' This tells us what the debate is about, but doesn't grab our attention. A strong hook sets the emotional and intellectual tone.

How to Fix It:
   Imagine you're painting a picture with your opening line. Instead of stating the motion, try something like: Every day, 10,000 children in Hong Kong see advertisements for sugary drinks—drinks that bring them a step closer to health issues with every sip. Why are we letting corporations profit from this?

2. Missing Signposting
   At 0:45, you transitioned directly into your first argument without telling us where we're going. This leaves us scrambling to follow your structure.

How to Fix It:
   Think of signposting as giving your audience a roadmap. For a P1 speech, use a structure like: Today, I'll present three arguments. First, I'll explain how advertising exploits children's developing brains. Second, I'll show why this creates harmful consumption habits. And third, I'll argue why the government is the right body to solve this problem. This gives judges and the audience clarity—they know what's coming and can follow your reasoning with ease.

3. Arguments are Unnamed
   At 1:32, you began discussing the impact of ads on children but never gave the argument a clear name or thesis.

 How to Fix It:
   Every argument needs a name and a thesis. Try: My first argument is Exploitation of Vulnerability. This is the argument that children lack the cognitive ability to critically evaluate advertising, making them uniquely susceptible to manipulation.
   This makes your argument instantly memorable and gives it conceptual weight.

4. Explanations Need Development

You said children are easy to influence but didn't fully explain why this is true, or why it matters.

How to Fix It:

Don't just state the claim—show us the mechanism. Explain: Children under the age of 8 cannot distinguish between advertising and entertainment. They trust what they see on TV as truth. This is not a matter of preference—it's a matter of brain development. When a cartoon character tells them to buy a sugary cereal, they don't question it. They simply believe.

Then connect the dots: And because they believe, they pester their parents. And because parents often give in, children consume products that are bad for them. This is the chain of harm we need to break.

5. Underdeveloped Company Incentives

You mentioned that companies care about profit—correct! But you stopped there. We need to see the full logic.

How to Fix It:

Develop the argument: Companies are not in the business of protecting children. They are in the business of maximizing returns. For them, a child is not a person—it's a market. They will spend billions on advertising because it works. But this isn't just a business decision—it's a moral one. We are choosing profit over childhood health, and that's the calculus we need to reverse.

6. Repetitive Without Depth

Between 2:15-3:00, you repeated the idea that advertising is bad for children at least four times, but you didn't add new evidence or reasoning each time.

How to Fix It:

This is a very common beginner habit! Instead of repeating, ask yourself: What's the next layer? Eg.

- Layer 1: Ads target children.
- Layer 2: Children are vulnerable.
- Layer 3: This vulnerability leads to poor health choices.
- Layer 4: This creates long-term public health costs.
- Layer 5: It's the government's job to prevent this.

Each layer builds on the last. If you're repeating, you're probably stuck on one layer.

MANNER (Delivery & Style)

Analytical Strengths

1. Vocal Effort
   You have a confident speaking voice—you can hear the passion when you talk about the subject. This is a great foundation.

2. Natural Tone
   When you speak without reading, your tone is warm and engaging. This is when you're at your best.

Areas to Improve

1. Reading from Notes

   At 1:15, 2:45, and 4:20, I could hear you drop eye contact and start reading from your notes. Your pace became robotic and your energy dropped significantly.

How to Fix It:
   Write your speech out in full on paper, then practice delivering it while looking up. The goal isn't to memorize word-for-word—it's to internalize the ideas.
   Try this exercise: Put your notes on your desk while standing up. Step away from the desk. Now deliver your speech to an imaginary audience in the back of the room. This forces you to engage, not read.

2. Repetitive Language and Filler Words
   You used the phrase 'the government will ban' seven times in the first three minutes. This makes your speech feel repetitive and reduces the impact of your words.

How to Fix It:
   Variety is key. Try: 'We propose a ban... We need to end this practice... We must stop corporations from... The evidence clearly shows we should intervene...' This keeps your language fresh and engaging.

3. Monotonous Pacing
   Between 2:00-3:30, your tone remained flat. This is common when you're reading or nervous. But it makes it hard for the audience to follow your key points.

How to Fix It:

Contrast is powerful. Slow down and pause at 1:57 before a big point. Raise your volume slightly when you're making the central conclusion. Then drop your volume to draw the audience in for a critical piece of evidence. This creates rhythm and keeps people engaged.

4. No Gestures/Physical Engagement

For a speech recording, this is hard to assess visually—but you can hear the lack of physical engagement in your voice. When you gesture, your voice naturally becomes more dynamic.

How to Fix It:

Practice with a mirror. Stand up when you practice (even for recordings). Use your hands to emphasize key points. This translates to vocal energy—it's one of the fastest ways to improve delivery.

5. Eye Contact (Audio Cue)

The 4:10 mark is a great example where you're reading from your notes. You can hear a drop in certainty. A judge would notice this even in a recording.

How to Fix It:

Commit to looking up every 10-15 seconds. Even if you lose your place, it's better to pause and find it than to read continuously. Judges value spontaneity and connection more than perfect reading.

STYLE MATCHING

We've analyzed your speaking style and identified a speaker whose delivery you could emulate for powerful results.

Style Match: Canada's 1st Speaker (WSDC 2023)

You share key strengths with this speaker: a naturally warm and engaging voice, a confident foundation, and genuine passion for your subject matter.

What Makes This a Good Match for You:

- Warm, conversational delivery that still commands attention
- Clear structure with bold signposting
- Strong opening hooks that grab the audience immediately

To Sound More Like This Speaker, Practice:

Cold Open: Start your speech with a powerful, image-based statement. Example: If I told you that your child would see 10,000 advertisements before their 10th birthday, wouldn’t you be outraged? Because that's the reality we're facing today.

- Aggressive Signposting: Be direct about your structure. Example: My first argument is on X. My second is on Y. And my third is on Z.
- Maintain Eye Contact: Practice the "look up and speak" exercise. You can hear the difference in confidence and authority.
- Use Gestures Even for Audio: It feels silly, but it works. Overemphasize gestures when practicing—it'll bleed into your vocal delivery.
- Vary Vocal Tempo: Slow down by 30% when you're introducing a new argument or delivering a key conclusion. Speed up slightly during explanations, but don't rush.

PERSONALIZED NEXT STEPS

Priority 1: Master the Hook

Your opening sets the entire tone. Commit to writing three different hooks for this motion and test them out loud before your next practice.

Priority 2: Structured Arguments

Each argument needs a name, thesis, and clear development. Use the 'Layer' technique (see above) to avoid repetition.

Priority 3: Delivery Focus

Step away from your notes. Stand up. Gesture like you mean it. Your vocal energy will follow—it's scientifically proven.

CORRECTION WORKFLOW ASSIGNMENT

Please record a corrected 45-60 second version of your opening segment (the first minute of your speech). Focus on:

- A powerful hook instead of starting with the motion
- Clear signposting of your three arguments
- Better eye contact and vocal variation

Submit your corrected version for instructor review, and we'll help you track the improvement side-by-side.

Page 4: Correction Workflow

General UI Components & Interactions

Navigation & Layout

None

```
Responsive Design:
  - Mobile-first approach (not required for MVP, but should be clean)
  - Max-width container: 1200px
  - Consistent padding: 24px (desktop)

Interactive Elements (Mock):
  - Hover effects on all buttons/cards
  - Smooth transitions (0.2s ease)
  - Loading skeletons (for future state)
  - Modal for "Submit" actions
  - Tooltips on icons
```

```
Notifications System:
  - Bell icon with badge (3 notifications)
  - Dropdown with mock notifications

User Profile Dropdown:
  - Avatar
  - Name
  - Role
  - Settings
  - Logout
```

Cards & Components

None

```
Card Design:
  - Background: #FFFFFF
  - Border: 1px solid #E2E8F0
  - Border Radius: 12px
  - Shadow: 0 1px 3px rgba(0,0,0,0.06)
  - Padding: 20px
  - Hover shadow: 0 4px 12px rgba(0,0,0,0.08)

Buttons:
  Primary: #2563EB | Hover: #1D4ED8
  Secondary: #3B82F6 | Hover: #2563EB
  Accent: #F97316 | Hover: #EA580C (for CTAs)
  Success: #22C55E | Hover: #16A34A
  Danger: #EF4444 | Hover: #DC2626
  Outline: transparent border + text

Badges/Pills:
  Format (WSDC/BP): Secondary Blue
  Role (P1/P2): Accent Purple
  Status (Submitted/Needs Review): Green/Red
  Difficulty (Easy/Medium/Hard): Green/Yellow/Red

Progress Indicators:
  - Linear progress bars (for scores, test progress)
  - Circular progress (for timer, overall score)
```

Tech Stack

None

```
HTML5
CSS3 (Flexbox/Grid)
Vanilla JavaScript (for UI interactions)
Font Awesome or Heroicons (for icons)
Google Fonts (Inter, Outfit, JetBrains Mono)
```

Specific Instructions for Cursor

None

```
1. Build all pages as static HTML files with embedded or linked CSS
2. Use placeholder text where content is dynamic (marked with [Placeholder])
3. Include interactive CSS states (hover, active, focus)
```

```
4. Make navigation consistent across all pages
5. Use CSS custom properties for brand colors
6. Implement responsive layouts (breakpoints at 768px and 1024px)
7. Include comments in code for easy identification of sections
8. Simulate data with JavaScript objects/mock arrays
9. Use Font Awesome for icons (free version)
10. Build with accessibility in mind (alt tags, ARIA labels)
```

Mock Data Structure (JavaScript)

JavaScript

```javascript
const mockData = {
  student: {
    name: "Sarah Chen",
    role: "Student",
    organization: "Capstone Debate Academy",
    avatar: "SC",
    streak: 5,
    totalPractices: 23
  },
  currentMotion: {
    text: "This House believes that artificial intelligence does more harm than good.",
    format: "WSDC",
    role: "Prime Minister"
  },
  leaderboard: [
    { name: "Sarah Chen", score: 5, time: "2:30", streak: 12 },
    { name: "Michael Wong", score: 5, time: "3:15", streak: 8 },
    // ...
  ],
  // Additional mock data as needed
};
```

Design Quality Checklist

None

```
☐ Consistent color palette across all pages
☐ Professional typography hierarchy
```

```
☐ Clean, uncluttered layouts
☐ Interactive hover states on buttons
☐ Responsive navigation
☐ Brand elements present (logo, tagline)
☐ Visual hierarchy clear
☐ Accessibility considerations
☐ Mock data looks realistic
☐ Flows make logical sense
```

User Flows to Validate

Student Journey:

1. **Dashboard** → "Start Practice" → **Practice Session** → Record → **AI Feedback** → Review → **Correction** → Submit → Dashboard
2. **Dashboard** → "Matter Test" → **Matter File Test** → Answer questions → Submit → See results (and leaderboard)
3. **Dashboard** → "Drill" → **Drills Page** → Complete drill → Submit for feedback

Instructor Journey:

1. **Instructor Dashboard** → View pending corrections → Select student → **Correction Review** → Listen to before/after → Add comment → Submit feedback
2. **Instructor Dashboard** → View leaderboard → **Leaderboard View** → Review top performers

---

Success Criteria for MVP

- ☐ All mock pages render without errors
- ☐ Navigation between pages works (HTML links)
- ☐ UI matches brand guidelines exactly
- ☐ Demo flows are intuitive and logical
- ☐ Screenshots can be taken directly from browser
- ☐ Partner presentation ready (clean, professional, error-free)
