MVP Scope: Demo Web Page Screenshots

For our initial go-to-market, the MVP will be a **non-functional demo** consisting of **web page screenshots** to show potential partners (starting with Capstone) exactly how the platform will look and work. This allows us to validate the user experience, gather feedback, and secure commitments **before** building the full product.

MVP Screenshot Specifications

View 1: Student Account View

- Diff tabs
- Account page → typical web app layout

Component	**Screenshot Content**
Dashboard	Shows a single hard-coded motion: "This House believes that artificial intelligence does more harm than good." Other features: Chosen debate format (WSDC) P1 speech Initial prep time timer
Speech Recording	A mock recording interface with a timer, record button, and a note: "Record your 8-minute speech."
AI Feedback	A mock feedback report based on a **hypothetical** speech, breaking down Matter and Manner with specific, actionable points.
Correction Workflow	A side-by-side view showing the original segment and a corrected version, with a "Submit for Instructor Review" button.
Matter File Test	A hard-coded 5-question multiple-choice test on the motion, with a mock leaderboard showing top scores.
Drill	A hard-coded drill: "Rebuttal Drill: Identify and counter three arguments in 2 minutes."

View 2: Instructor / Organisation Account View

Component	Screenshot Content
Admin Dashboard	A list of all students in the organisation (e.g., Capstone) showing who has submitted corrections.
Before-and-After Viewer	A side-by-side player for each student's original and corrected segment.
Comment Box	A field for the instructor to type feedback directly on the student's submission.
Leaderboard View	Organisation-wide leaderboard for matter file tests.
