Arete: AI-Powered Debate Practice Platform

We are building the first AI-powered debate practice platform designed specifically for debate academies and schools. Our solution provides students with targeted, actionable feedback on every speech—helping them isolate exactly what to improve and how to get better—while giving instructors a clear window into student corrections so they can focus their limited time on high-impact coaching.

Our Mission: Democratize elite debate training for every student.

Tagline: "Find Your Voice. Sharpen Your Argument."

By Sept 2028: Secured 30 partnerships internationally with $100K profit reaching 10K+ students.

a. Function 1: Student Practice
    i. Selections
        1. Public/private modes → organisation access
        2. Choose debate format and prep time
        3. Choose either (motion/topic/difficulty/randomised)
        4. Choose speaker role
    ii. Prep
        1. Motion bank
            a. Capstone docs
            b. Debate data and other AI motion platforms
            c. Tabbycat history
        2. Timer and lock screen
            a. Similar to exam.net
        3. Role
            a. Generate hypothetical speech bullet points → if selected speaker is a non-first speaker role → extra prep time for reading and writing rebuttals
                i. Transcribed case files
    iii. Speech and feedback
        1. Give and record speech → video and voice recording
            a. Current tech. analysing meetings + presentations
        2. Feedback
            a. Analytical strengths and gaps - matter
            b. General + specific style matching (emulate credited speakers, HKT-specific) - manner
            c. Feedback sheets + verbal feedback recordings
        3. Suggestion

        a. Instructs student to correct a particular segment of their speech
        b. Instructor sees the before and after

b. Function 2: Matter file tests w/ leaderboard
    i. Daily updates
    ii. From news sources (compile database, Google news) → top results → simple 5-question quiz
    iii. Instructor sees the scores

c. Function 3: Drills and exercises for specific skills
    i. Instructor sees the submissions
